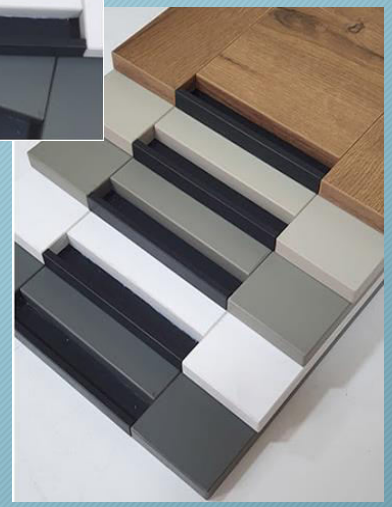
- **COMPANY L p**roduces WORKTOPS that are highly resistant on the surface, and waterproof around the edges; half-light for ease of transport, compared to its alternatives.
- Presents lacquered furniture components as prestigious as lacquered, but more durable and resistant.
- Front surface and all edges are specially manufactured as 1,5 mm and exterior compact laminates as 1,5 mm from polystyrene material; coated on the lower surface of MDF panels with honeycomb filler, perfectly integrated all together; edges are processed with flawless 'edge banding technology' of **COMPANY L** to ensure waterproofing.
- The Worktops are sized according to projects, four sides are covered with the special 'edge banding technology' and the surface, with compact laminate. Oven and sink spaces are opened in CNC machines as per request and edges of the openings are waterproofed.

Furniture Components



Flawless ‘**Edge Banding Technology**’:
- No need for special pre-glued edge bands.
- Waterproof feature at edges.
- Wide range of temperature resistance.
- Maintains glossy surface at each point of edges.
